After the program while we visit, eat and drink, a videographer is available for anyone who would like to record a tribute, tell a favorite story, or leave a message for the family.

For a little more of Robert at your leisure, we're maintaining a website at [robertrudie.com](http://robertrudie.com). Visit any time.

Robert kept this quote, from the physicist Richard P. Feynman, in a frame on his desk.

I can live with doubt and uncertainty. I think it's much more interesting to live not knowing than to have answers which might be wrong.

I don't feel frightened by not knowing things, by being lost in a mysterious universe without any purpose, which is the way it really is, so far as I can tell.

It doesn't frighten me.
